

MHA Business Solutions

Managed Health Care Associates, Inc. (MHA), a leading health care service company focused on alternate site health care providers, is pleased to announce an exclusive partnership with Rock-Pond Solutions to deliver the next generation of business and information solutions to the home infusion and specialty pharmacy industries.

The Next Generation of Reporting and Communications....

The MHA Business Solutions Center

A business information platform that delivers powerful reports and tools that will help members improve the efficiency and profitability of their home infusion or specialty pharmacy. Installed directly on the pharmacy computer system and integrated with the dispensing data, the MHA Business Solutions Center ensures that member data is secure *and* easily accessible. The initial phase of this offering introduced at the 2011 NHIA Conference includes the first-to-market applications outlined below:

- **Member Resource Center** – Serves as the centralized platform to improve member communication by channeling information from multiple sources to a single, easily accessible point. In addition to MHA specific information, real time Home Infusion and Specialty Pharmacy Industry news will be available.
- **Drug Recall Management System** – Provides drug recall alerts specific to the NDC codes within the pharmacy inventory management system. Instantly see patients impacted and inventory on hand at the lot number level.
- **Inventory and Profitability Reports** – A series of *Rock-Pond Reports* to help manage products, patient and dispensing information as well as management reports that show profitability and business trends by key indicators.
- **GPO Purchasing Reports** – MHA reports currently distributed to members will be conveniently housed and readily available to authorized individuals within the organization.

And More to Come.....

The MHA Business Solutions Center has a core set of powerful reports available immediately. The next release will expand the product suite to include a data extraction tool to support MHA's Specialty Pharmacy Solutions as well as Net-Rx claim reconciliation and suite of reimbursement services. Please inquire with your MHA National Account Manager for more information.
