!as_1038 - Orders with Missing Therapies

Audit and Data Analysis

Overview: Revenue should be associated to a therapy and when orders do not have therapies the revenue associated with it can be lost from its appropriate therapy type. This report identifies those orders that have a missing therapy to reduce billing errors and errors in reporting revenue or other financial information by therapy type.

Sample:

Orders With Missing Therapies

!as_1015a - New Revenue for Primary Claims Billed from {} through {} Financial Management

Overview: Revenue for a billed date range grouped by 3 user defined groups. Choose between payer group, payer type, payer, combined payer, referral source, physician, HCPCS code or therapy for each of the groups. This will only include revenue for the primary claims so the totals will constitute the new revenue for the period selected.

Benefits: In Ascend, the claim log shows all claims, both new claims and bills to the secondary. In order to know your revenue for the month you must be able to separate out the revenue from claims that were billed for the first time.

Sample:

New Revenue for Primary Claims

Billed from 5/1/2010 through 5/31/2010
(Based on Transaction Date)
